**DETAILED ACTION**

***Response to Amendment***

The declaration filed on December 11, 2003 under 37 CFR 1.131 is sufficient to overcome the Scheiner et al. reference.

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

***Allowable Subject Matter***

Claims 11-19 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 11, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for determining the thickness of at least one layer of a substrate that has geometric structures that lead to diffraction of light, including the steps of: calculating at least one of reflection and transmission light intensity values using an iteration model in which the individual layer parameters and the geometric dimensions of said geometric structures of said substrate are included as further parameters; and modifying the parameters to effect correspondence between the measured and calculated values, in combination with the rest of the limitations of claim 11.
